Enviro Innovate Clean-tech Foundation Presents at the Wyoming Infrastructure Authority's Innovation and Financing Conference

October 5, 2017

JACKSON, WY / BOSTON, MA / ONTARIO – The Enviro Innovate Clean-tech Foundation’s Chairman, Tom Thompson, presented today at the Wyoming Infrastructure Authority's Innovation and Financing conference in Jackson, Wyoming.

Thompson participated on two panels; the first on the topic of emerging technologies in the area of carbon capture, and the second to discuss all of the issues and opportunities surrounding carbon product innovation.

On the topic of carbon product innovation, Thompson’s presentation to conference attendees addressed a number of key areas, including:

- The anatomy of an ideal conversion solution
- The criteria that the foundation embraces when considering CO₂ conversion solutions
- Key areas of focus for all CO₂ conversion technology businesses

As part of this presentation, Thompson highlighted three case studies:

- The first, a technology that takes captured CO₂ and converts it into a 200 proof, undenatured alcohol with applicability to all food and industrial uses;
- The second, a technology that converts hydrogen and captured CO₂, or natural gas and captured CO₂, into carbon black / nanoscale carbons; and
- The third, a technology that has the potential to securely utilize captured CO₂ in large quantities as an Earth Battery™, while at the same time supplementing existing renewable resources to provide secure baseload energy.

“In our view, all of these technologies represent disruptive drop-in solutions, with global applicability, that are scalable, and have a GHG footprint lower than existing / legacy products”, stated Thompson.

About The Enviro Innovate Clean-tech Foundation

The Foundation leads a collaborative community organized to ensure that the Americas lead and retain an important voice when globally discussing issues pertaining to energy, the environment and climate change by bringing credibility and practicality to the discussion. The Foundation educates and advances an approach that joins technology, innovation, academia, government, utilities, industry, and other interested stakeholders, targeted toward educating, developing and implementing practical energy and environmental policies and solutions.

The Foundation spearheads a blue chip group of organizations and individuals dedicated to inspiring transformation, enabling new markets, and advancing solutions to some of our world's grandest challenges.
